

## TECHNOLOGY COMMITTEE MEETING

February 19, 2026

### Board Committee Members

Tom Burgunder, Chair  
Bobbie Fan  
Dr. Chris Brussalis  
Jen Liptak

### Other Board Member

Laura Sohinki (in-person)  
Senator Lindsey Williams  
Emma Shoucair  
Tia McClenney

### Approval of Minutes:

The minutes of the January 22, 2026 Technology Committee meeting were approved.

### Proposed Resolutions:

The first resolution reviewed at the Committee meeting was seeking authorization to amend a contract with SMSA Limited Partnership, doing business as Verizon Wireless.

It was reported that the agreement entered into in July 2018, provided the installation and maintenance of a multicarrier distributed antenna that allows PRT patrons using Verizon cellular data plans to utilize their cellular telephones while inside transit stations and/or tunnels.

In January 2021, the agreement was amended to include New Cingular Wireless PCS, LLC, doing business as AT&T Mobility, which allows PRT patrons with AT&T cellular data plans to use their cellular telephones while inside the transit stations and/or tunnels.

The Technology Committee agreed to recommend entering into a second amendment which would expand the system to include PRT's Mt. Washinton Transit Tunnel, increase the annual license fee that Verizon and any other participating cellular providers pay to \$33,746.85, with one percent annual fee escalation, and extend the initial term of the agreement through December 31, 2035, with two additional five-year renewal options absent termination by either PRT or Verizon.

The next resolution reviewed was seeking authorization to enter into an agreement to provide transit ridership data analytics service for automated passenger counter data processing and analysis of ridership reporting.

It was reported that the proposal submitted by Korbato has been determined to be the highest rated proposal for the performance of these services.

The Technology Committee agreed to recommend entering into a three-year agreement with Korbato for a total not-to-exceed amount of up to \$833,423, with an option to extend the term of the agreement up to an additional two one-year periods, at the sole discretion of PRT.

The final resolution review by the Committee was seeking authorization to amend an agreement with WWT, Inc., doing business as VOIP Networks, for Phone Update Services.

It was reported that through onsite investigations and additional PRT staff interviews, the contractor discovered additional hardware and software needs since the agreement that was entered into in November 2024.

In order to continue to meet the needs of PRT to maintain the services through the current term of the agreement, implement IVR, and amend the scope of the agreement to include Connection Modernization, the Technology Committee agreed to recommend an increase to the previously authorized total not-to-exceed amount for the agreement by \$500,000.

Presentation:

At the Board's request, staff updated the Committee on the technology readiness and public roll-out of the ReadyFare project.

With no further business, the meeting was adjourned.
