

### ***Pittsburgh Regional Transit Responds to Cybersecurity Incident***

**FOR IMMEDIATE RELEASE (December 23, 2024)** - Pittsburgh Regional Transit (PRT) is actively responding to a ransomware attack that was first detected on Thursday, December 19.

Upon discovering the incident, PRT immediately launched an investigation, activated its Cyber Incident Response Team, notified law enforcement, and engaged nationally recognized third-party cybersecurity and data forensics experts. These teams are working diligently to determine if any information has been compromised.

While rail service experienced temporary disruptions on Thursday morning, transit services are currently operating as normal. However, some other rider services remain negatively impacted, including PRT's Customer Service Center, which is temporarily unable to accept or process Senior and Kid's ConnectCards.

PRT takes seriously the security of its systems and the data it stores. PRT is committed to providing public updates as the investigation evolves.

PRT will continue to provide updates as appropriate. Due to the sensitive nature of the situation, specific details cannot be shared at this time.
